SV12

FEEDER FOR ELASTIC THREADS

FEEDER FOR ELASTIC THREADS CLASS SV12

The device SV12 is a feeder for elastic threads in a 12 needle smocking sewing machine with elastic thread in the looper. Without this unit the thread will be knotted as they move without a very small tension to the sewing machine and as a consequence the sewing operation is very difficult

FEATURES

- Unwinding shafts motor driven, single speed control on each shaft and on/off lever to start/stop the unwinding motor.
- DC motor controlled by DC drive specially designed by AMP PISANI for this device
- Sensor to stop the device when a thread is finished.
- Transparent guard in the position where the threads go out of the device.

TECHNICAL DATAS

- Max dimension of the bobbin thread : diameter 15 cm, width 25 cm
- Power supply : 1,2kW 230V single-phase
- Number of bobbins : 12
